HAZTEC® Clair FR AS Ladies Combat Trousers

Contrast Stitching • Flame Retardant • Anti-Static

PRODUCT DESCRIPTION

These premium trousers are of a quality that sets them apart from average flame retardant and anti-static clothing. The 320gsm Protex® material is inherently flame retardant and anti-static which means that its special safety properties cannot be reduced by repeated washing as it is less expensive clothing that has been surface treated to render it both FR and AS. The anti-static and flame retardant symbols are clearly heat sealed to the leg giving a visible proof of their conformity.
