

## HF6421

### Zone 1 Clip-On Helmet Ear Defender

Lightweight • Designed to fit all Scott Helmets • Also fits on Iris 2 Helmet

#### PRODUCT DESCRIPTION

Zone 1 ear defenders are designed for environments with low to medium noise levels. Zone helmet mounted ear defenders are suitable for environments that require the use of head protection in combination with hearing protection, such as the construction, forestry, oil & gas sector, metal fabrication and heavy engineering industries.

These helmet mounted ear defenders can be simply combined with face protection by utilising the universal 30mm attachment post fitted as standard. Please ask about the range of face visors available in either acetate or polycarbonate, for extra protection.

Standby and parked positions allow the products to 'stand off the head' ready for use, or to park the ear defender out of the way on the rear of the helmet when not in use.

#### FEATURES & BENEFITS

- Maintains optimum and even cushion pressure
- Twin stirrup design maintains stability and attenuation performance
- Low profile
- Lightweight

#### CERTIFICATION

- EN 352-3: SNR 27
