

DK0033

LNG Driver Refuelling PPE Kit

Range of Products • PPE Kit Designed for LNG Drivers

PRODUCT DESCRIPTION

This kit is designed to be used for drivers filling their vehicles with LNG. As this is a very cold liquified gas then extra precaution needs to be taken to ensure you are wearing the correct PPE. The gloves give a EN511 contact and convective cold contact level 2 protection, and the visor and goggles protect you face and eyes. Leather is traditionally the best material for gloves as PVC or rubber material becomes cold then crack. These gloves have a high EN511 rating therefore protecting your hands from cold burns.

FEATURES & BENEFITS

- GL1828 - Thermal Leather Water Resistant Gloves
- HF0250 - Browguard & Visor
- EW0220 - Splashtec Chemical Goggle
