

## GL9822

# Cryogenic Cold Protection Gauntlet

Cryogenic Handling • Extreme Cold Protection • Waterproof Membrane

### PRODUCT DESCRIPTION

The GL9822 Cryogenic Extreme Cold Protection Gauntlets provide exceptional protection for cold down to  $-197^{\circ}\text{C}$ , for cryogenic handling and liquefied gas transportation. Suitable for handling Dry Ice. They have a waterproof hydrophilic microporous membrane and a glove + thumb/index finger reinforcement in 1mm thick cowhide, fire-resistant leather. The gloves are lined with wool fleece and have a hydrophilic, microporous insert.
