

HAZCHEM®

L1SKT BASIC SPILL KIT TRAINING – 1.5 HOURS

Perfect for those needing to learn how to effectively use spill kits

This spill kit course is designed for individuals and operatives that may be employed in a shop or floor location who must respond to minor day to day spills and leaks in their own environment.

The L1SKT course is not deemed sufficient for individuals who are considered either to be part of a spill response team or who may act as first responders to a significant spillage incident. Please refer to the L2SRT course.

For further information on our other courses available please contact one of the team on **+44 (0)1280 841400** or email **sales@hazchemsafety.com**

‘Stay Safe, Be Protected , Trust Hazchem Safety’

ATTENDEES & DURATION

The L1SKT spill training course contains up to 2 separate sessions. Each session is a complete spill kit mini course and allows a maximum of 15 individuals per session. The course can therefore offer training for a maximum of 30 individuals (2 sessions).

Each session will last for approximately 90 minutes plus a 10-minute break between sessions.

Fees on application

PROVISIONS

- Suitable venue room with low level lighting to show a PP presentation.
- PC compatible projection equipment and screen, flip-chart & pens..
- Clean surface area/floor about 3 x 2 m within or close to the training room to carry out the dry demonstrations.
- A range of your site spill products relevant to the attendees and the course content.

COURSE OBJECTIVES & OUTLINE

OBJECTIVES

1. To provide operatives with the knowledge of how to safely use spill products provided on your site.
- 2 To highlight the importance of having a simple, effective, response action plan.
3. To stress the importance of preventing spillage escape and reducing impacts upon the environment
4. The training meets all Environmental Agency, DEFRA and ISO 14001 requirements.

OUTLINE

- Short video presentation.
- The do's and do nots for safe spill response.
- The importance of being prepared – a simple plan.
- Golden rules for the plan.
- Typical spill kit components and their uses.
- Your spill kits – locations – safe use – deployment.
- A dry, interactive demonstration using your own spill product.
