

HAZCHEM®

L1 SKTTT TRAINER TRAINING – 4.5 HOURS

Gain confidence to advise others how to effectively use spill equipment

The attendee will acquire the understanding of spill kit types, contents and safe deployment. This will enable the trainer to deliver a competent course to work colleagues at onshore facilities who may be called upon to deal with day to day spills in their workplace.

The course is not structured to train individuals in the skills of presentation or to train them to become trainers. It will introduce and show safe response methods to enable trainers to confidently and effectively demonstrate simple spill response methodology.

NB This course is not considered adequate training for trainers who are planning to train Company response teams or where significant spill volume or hazard potential exists.

For further information on our other courses available please contact one of the team on **+44 (0)1280 841400** or email **sales@hazchemsafety.com**

‘Stay Safe, Be Protected , Trust Hazchem Safety’
